

DMS Charteris Gold and Precious Metals Fund

Investment Strategy

The Fund will primarily invest in instruments with direct underlying gold and/or precious metals exposure and shares in companies world-wide whose core business is involved in the mining, refining, production and marketing of gold and/or precious metals. Investment may be undertaken indirectly in other commodities and minerals.

Investment Process

The majority of the Fund will be invested directly in "blue chip" gold and precious metal mining companies with market capitalisation in excess of \$500m. Circa 25% will be mid-cap/smaller gold mining companies with a market capitalisation below \$500m. A large proportion of the investments will be in US, UK, Canadian and Australian companies.

Fund Manager's Comments

The Fund went down -23.15% on a total return basis for calendar year 2020. There has been a high level of volatility in the Gold and the precious metal markets thanks to the corona virus pandemic.

There was significant movement amongst the precious metal miners and vast selling of listed ETFs during the last quarter as well as a drop in the spot prices for both Gold & Silver.
